EDUCATION

Pune Vidyarthi College of Engineering, Pune [2025–2029] — B.Tech in Information Technology — 9.26 CGPA

Kendriya Vidyalaya VRDE, Ahmednagar — Class XII: 84.60% | Class X: 92.80%

SKILLS

Languages: Python, C++, SQL **Database:** MySQL **AI/GenAI:** RAG fundamentals, AI/ML fundamentals, LLM-based applications

DSA: Currently learning Data Structures & Algorithms from fundamentals **Technologies:** Streamlit, Ollama, FAISS, LangChain, FastAPI **Tools:** Git, GitHub, VS Code, ChatGPT, Claude

PROJECTS

DriveLegal — RAG-Based AI Road Safety Chatbot | [GitHub](#)

- Built an offline RAG chatbot capable of answering road-safety and traffic-law queries using location-specific legal data from India and international jurisdictions including the USA, Canada, UK, Germany, Singapore, and others, with cited laws and applicable fine amounts.
- Ingested and organized legal traffic laws, regulations, and fine schedules from multiple countries into a searchable knowledge base, enabling jurisdiction-specific retrieval rather than relying solely on the LLM's internal knowledge.
- Designed a RAG pipeline using FAISS + LangChain, chunking legal PDFs and retrieving relevant provisions through all-MiniLM-L6-v2 embeddings to improve response grounding and reduce hallucinations.
- Integrated local Mistral 7B via Ollama to enable fully offline inference with zero API cost and greater control over retrieved legal sources.
- Implemented an offline reverse geocoder for GPS-based, city-level jurisdiction detection, enabling location-aware legal responses.
- Developed a FastAPI backend and Streamlit frontend for end-to-end query processing and interactive chatbot access.
- Built the project as a team submission for the BIMSTEC AI Road Safety Hackathon 2026, shortlisted among 21 teams for the Grand Finale at IIT Madras.
- **Technologies:** Python, RAG, FAISS, LangChain, Mistral 7B, Ollama, all-MiniLM-L6-v2, FastAPI, Streamlit.

ACHIEVEMENTS

- Finalist / Grand Finale Shortlist — BIMSTEC AI Road Safety Hackathon 2026; shortlisted among 21 teams to pitch the idea at IIT Madras.
- NPTEL Elite + Silver — The Joy of Computing using Python (2026), 80% consolidated score.
- Selected Contributor for GirlScript Summer of Code (GSSoC) 2026, contributing to open-source software projects.
- Participated in HP Power Lab 2.0 — Round 1 Online Assessment conducted by Hindustan Petroleum Corporation Limited.

CERTIFICATIONS

NPTEL Elite + Silver — The Joy of Computing using Python (2026) | 80% consolidated score

EXPERIENCE

Web Team Member — Information Technology Students' Association (ITSA), PVG's COET, Pune

Part-time | Aug 2026 – Present | Pune City, Maharashtra, India | Hybrid

- Contributing as a Web Team Member to the association's website and digital initiatives.
- Supporting web development, maintenance, and implementation of digital content and features.

EXTRACURRICULAR ACTIVITIES

- Participated in national-level technology and innovation competitions, including the BIMSTEC AI Road Safety Hackathon and HP Power Lab 2.0 online assessment.
- Collaborative team-project experience with responsibility for collecting and structuring domain data for a multi-jurisdictional AI application.

CAREER FOCUS

- Seeking software development, AI/GenAI, and general IT internship opportunities where I can apply Python/C++, strengthen DSA and contribute to practical technology projects.
